

EditEmployeeInfoDBC  
::collectLuid

```
graph LR; A["EditEmployeeInfoDBC::collectLuid"] --> B["Client::execute"]
```

A diagram showing a call from a function to a client. On the left, a gray rectangular box contains the text "EditEmployeeInfoDBC" on the top line and "::collectLuid" on the bottom line. A blue arrow points from the right side of this box to the right side of another rectangular box on the right. This second box is white with a black border and contains the text "Client::execute".

Client::execute
