

CallbackBase

```
classDiagram
    class CallbackBase {
    }
    class FileSystemCallback_File_receiveLatest_Base {
    }
    CallbackBase <|-- FileSystemCallback_File_receiveLatest_Base
```

The diagram illustrates a class hierarchy. At the top is the 'CallbackBase' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name, while the other two are empty. Below it is the 'FileSystem::Callback_File_receiveLatest_Base' class, represented by a shaded rectangle with three horizontal compartments. The top compartment contains the class name, and the other two are also shaded. A blue arrow with an open triangular head points from the top compartment of the lower class to the bottom edge of the 'CallbackBase' class, indicating an inheritance relationship.

FileSystem::Callback
_File_receiveLatest_Base
