

IceProxy::Ice::Object

```
classDiagram
    class IceProxy_Ice_Object["IceProxy::Ice::Object"]
    class IceProxy_FileSystem_File["IceProxy::FileSystem::File"]
    IceProxy_FileSystem_File --|> IceProxy_Ice_Object
```

The diagram shows a class hierarchy. At the top is the base class 'IceProxy::Ice::Object', represented by a white box with two empty compartments below the name. Below it is the derived class 'IceProxy::FileSystem::File', represented by a grey box with three compartments. A blue arrow with an open triangle head points from the derived class to the base class, indicating inheritance.

IceProxy::FileSystem
::File
